

CareOne PMV Clinical Competency Checklist

This competency checklist is to be used to document clinician’s knowledge and skills for placement of PMV valves in vent and non-vent dependent populations. The training format includes inservice education, practice under direct supervision and independent practice with indirect supervision. Upon completion of this checklist the clinician will receive recognition as a PMV Specialist.

Clinician Name: _____ **Department:** _____

Date: _____ **Educator/Location:** _____

<u>Performance Criteria</u>	<u>Inservice</u>	<u>Supervision</u>	<u>Independent</u>
Demonstrates knowledge of benefits and contraindications of PMV use			
Completes chart review and verifies physician order for use			
Provides Education to patient and family
